Test your browser to see how well you are protected from tracking and fingerprinting:

TEST YOUR BROWSER

☑ Test with a real tracking company ?

How does tracking technology follow your trail around the web, even if you've taken protective

HOW TO READ YOUR REPORT

You will see a summary of your overall tracking protection. The first section gives you a general idea of what your browser configuration is blocking (or not blocking). Below that is a list of specific browser characteristics in the format that a tracker would view them. We also provide descriptions of how they are incorporated into your fingerprint.

HOW CAN TRACKERS TRACK YOU?

Trackers use a variety of methods to identify and track users. Most often, this includes tracking cookies, but it can also include browser fingerprinting. Fingerprinting is a sneakier way to track users and makes it harder for users to regain control of their browsers. This report measures how easily trackers might be

Here are your Cover Your Tracks results. They include an overview of how visible you are to trackers, with an index (and glossary) of all the metrics we measure below.

Our tests indicate that you are not protected against tracking on the Web.

IS YOUR BROWSER:

Blocking tracking ads?	**No**
Blocking invisible trackers?	**No**
Protecting you from fingerprinting?	**Your browser has a unique fingerprint**

The OSINT Process

Identifying the source — Where you can find the information

Harvesting — Its time to get relevant data from the identified source

Data processing — Process the acquired data and get the meaningful information

Analysis — Join the data acquired from multiple sources

Reporting — Create the final report

Software

+ Operating Process

- Hardware
  - Acquired with cash, wiped out, installed with bare bones
  - Disabled camera / mic/sound / location / Bluetooth

- Internet connection
  - Cash prepaid anonymous SIM card with prepaid data plan
  - Cash paid basic mobile device that tethers internet
  - Public hotspot (but be careful!)
  - Always privacy software layer on top
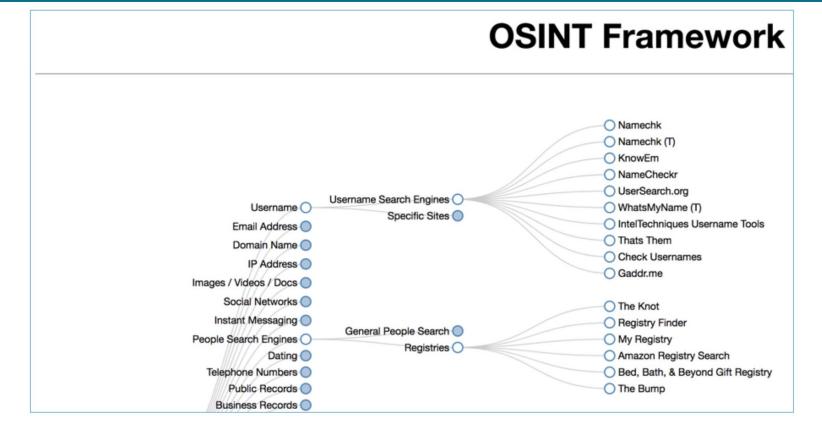

- Software tools to hide your identity

  - VPN (for ex. Proton VPN) - kill switch is a must!

  - Virtual Machine (VirtualBox + some Linux version for ex. Parrot OS)

  - TOR / Various privacy-oriented browsers

- Software tools to collect / automate evidence gathering

  - Hunchly ($)

  - Screenshot grabbers (Greenshort / Fireshot / Lightshot)

  - Maltego Casefile

  - Evidence collection templates

- Cyber personas

  - If required, created using secure email and prepaid sim card (for verification)

  - Meticulous buildup of cyber personas: consistency of the narrative with time zone, language settings, browser agent ID, VPN

'Stalker found celeb by studying the reflections of her pupils in photos'

sky NEWS **Sky News** 11 October 2019

A man has been arrested in Japan on suspicion of stalking a pop star by studying the reflections of her pupils in photos she shared on social media and using Google Street View to find out where she lived.

A Tokyo police official refused to disclose details about the investigation, but local media reported the alleged victim was a "pop idol" and the suspect was an "avid fan".

The official, speaking to the Associated Press on condition of anonymity, confirmed on Friday that Hibiki Sato, 26, was arrested on 17 September on suspicion of indecent behaviour in connection with stalking and causing injuries to a 20-year-old woman.

Police said he allegedly pounced on the woman from behind and groped her, injuring her in the process.

Public broadcaster NHK and other Japanese media reported this week that the suspect found out which train station she frequented by blowing up images she had posted online.

He used the high-resolution images of her pupils to work that out - and reportedly studied other photos she had shared on social media, including of her apartment, to figure out where she lived.
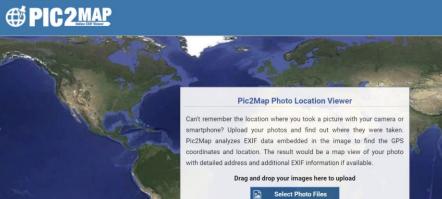

The case has raised alarm in the country over the potential dangers of sharing personal images and information on social media.

Tokyo Shimbun, a daily newspaper, warned its readers that selfies could reveal their surroundings - enabling the location in a photo to be identified.

The Company

Google Inc. was founded in 1998 by Sergey Brin and Larry Page to make it easier to find high-quality information on the web. The company is based on three years of research in web search and data mining done by the founders in the Stanford University Computer Science Department. Google Inc.'s headquarters are located in scenic downtown Palo Alto, California.

Google Inc. is not at present a publicly traded company, and we are currently unable to speculate on whether or when our privately-held status might change.
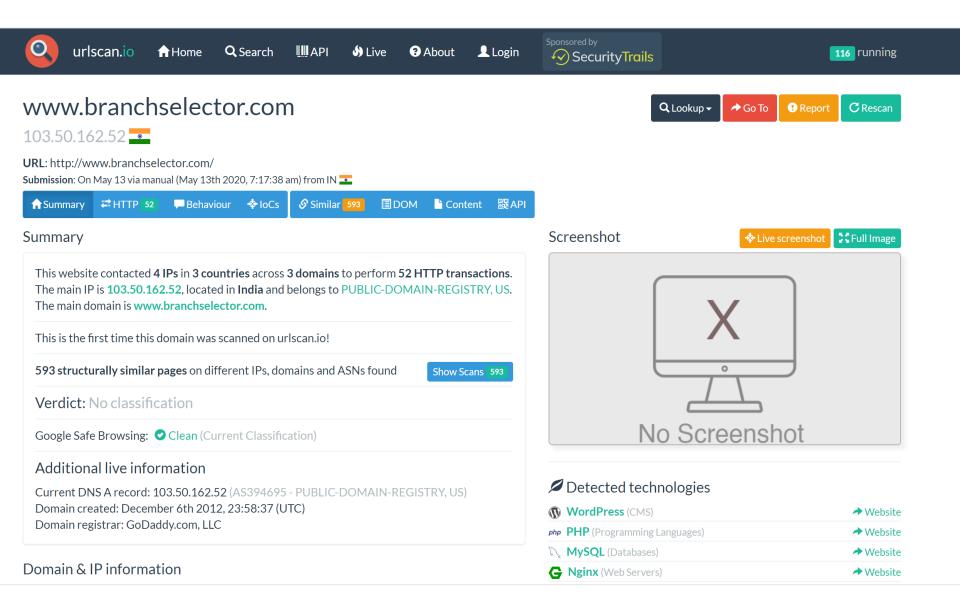

The Name

10^100 (a gigantic number) is a googol, but we liked the spelling "Google" better. We picked the name "Google" because our goal is to make huge quantities of information available to everyone. And it sounds cool and has only six letters.

Neck and Neck problem

- Did you know that your head weighs around 04 or 05 kg? All supported by some pretty small bones in your neck! A Quick look at biomechanic of the body shows that when you are slouched over a phone at 45 degree angle.its equivalent to placing 22kg of stress on the neck! This often translates into headache and pain down the back....consider your posture!

ANY
QUESTIONS?

I HAVE NOT FAILED. I'VE JUST FOUND 10,000 WAYS THAT WON'T WORK.

Thomas A. Edison

THE DIFFERENCE BETWEEN AVERAGE PEOPLE AND ACHIEVING PEOPLE IS THEIR PERCEPTION OF AND RESPONSE TO FAILURE.

John C. Maxwell

FAILURE ISN'T FATAL BUT FAILURE TO CHANGE MIGHT BE.

John Wooden

CYBER PATRIOT

THE GREATEST GLORY IN LIVING LIES NOT IN NEVER FALLING, BUT IN RISING EVERY TIME WE FALL.

RALPH WALDO EMERSON

I CAN ACCEPT FAILURE, EVERYONE FAILS AT SOMETHING. BUT I CAN'T ACCEPT NOT TRYING.
